DISCUSSION:

A prescreen was conducted at the Paisano Mine/Prospect site located on the Laguna Pueblo in New Mexico. The site is under the jurisdictional boundary of the Laguna Pueblo. The site is located in a remote area of the Laguna Pueblo, down a steep rocky ravine area. There are no visible signs of a mine/prospect or surficial disturbances in the area of the location. An abandoned sheep camp is visible from the site. The nearest residence is approximately 6.1 miles from the site. Due to a lack of targets in the nearby area, it is recommended that the site receive a designation of No Further Remedial Action Planned (NFRAP).
